MINISTRY OF ENERGY

The MINENERGÍA is the highest collaborative body of the President of the Republic in the tasks of government and administration of the energy sector. Its main functions are: to prepare and coordinate plans, policies and standards for the proper functioning and development of the energy sector, to ensure its compliance and give advise to the Government on all matters related to the energy sector, considering all types of primary and secondary

energy source. It was created by Law N° 20.402 of 2009 that modifies Decree Law N° 2.244/1978.

NATIONAL COMMISION OF ENERGY

The CNE is a decentralized public institution with its own capital and full capacity to acquire and exercise rights and contract obligations, whose communications with the President of the Republic are channeled through the MINENERGÍA. It is responsible for analyzing prices, tariffs and technical standards to which the production, generation, transport and distribtion of energy companies must adhere. All of the above, to provide a sufficient and safe service, compatible with the most economical operation.

It was created by Law N° 20.402 of 2009 that modifies Decree Law N° 2.244/1978.

SUPERINTENDENCY OF ELECTRICITY AND FUE

The **SEC** is a functionally **decentralized** service, whose purpose is to **supervise** compliance with legal and regulatory norms as well as technical standards on the generation, production, storage, transportation and distribution of fuels, gas and electricity; services provided with current regulations and without danger to people or things. It was created by Law N° 18.410 of 1985.

NATIONAL OIL COMPANY

ENAP is a company owned by the State of Chile, with legal capacity and its own assets, which relates to the President of the Republic through the MINENERGÍA. Its main purpose is the exploration, production, refining and commercialization of hydrocarbons and their derivatives. In addition, ENAP may participate in companies that develop activities related to the generation of power and exploration and exploitation of geothermal energy. It was created by Decree with Force

NATIONAL COMMISSION OF NUCLEAR ENERGY

of Law N° 1 of 1987.

It is an organism of autonomous administration of the State, which relates with the Government through the MINENERGÍA. Its functions, among others, include addressing issues related to the peaceful uses of atomic energy; to regulate, supervise and control relevant nuclear and radioactive facilities throughout the country; and to advise the Government on matters related to nuclear energy.

It is the only entity empowered to conclude legal acts related to lithium. It represents the State of Chile in matters regarding the exploitation of grantable substances that are accompanied by lithium, being able to request their separation. It was created by Law N° 16.319 of 1965.

NATIONAL ELECTRICAL COORDINATOR

he **Coordinator** is a technical and independent organism, in charge of the coordination of operation of the interconnected facilities of the SEN that operate interconnected among It was incorporated in the LGSE by means of Law N° 20.936 of 2016.

PANEL OF EXPERTS

The **Panel of Experts** is an autonomous collegiate organism whose function is to solve the discrepancies and conflicts that arise as a result of the application of electrical and gas It was incorporated in the LGSE by means of Law N° 19.940 of 2004.

ENERGY SUSTAINTABILITY AGENCY

The Energy Sustainability Agency (ex AChEE) is a non-profit, private-law legal entity whose purpose, among other matters, is to promote, strengthen and consolidate the efficient use of energy on a national and international level. It also seeks to implement public-private initiatives in the different sectors of energy consumption, contributing to the competitive and sustainable development of the country. It was created in 2010, by virtue of **Decree Law N° 2.244** of 1978.

National Energy Policy DS 148/2016 MINENERGÍA

The Chilean Energy Policy - Energy 2050 built through a participatory process, proposes a vision of the energy sector by 2050 that corresponds to a reliable, sustainable, inclusive and competitive sector; in order to move towards a sustainable energy in all its dimensions. To achieve this vision, the policy defines plans of action and goals for two horizons: 2035 and

The long-term energy policy will be updated in a participatory manner every 5 years.

Washington Convention **DS 531/1967 MINREL**

Also known as the Convention for the Protection of Flora and Fauna and the Scenic Beauties of America. Its objective is to protect all species and genres of the flora and fauna of the Americas from extinction and to preserve areas of extraordinary beauty. Among other matters, it establishes conditions for activities carried out in areas with some degree of official protection.

Ramsar Convention **DS 771/1981 MINREL**

onvention on Wetlands of International Importance, especially as Waterfowl Habitat. Its objective is to ensure the conservation of wetlands and their flora and fauna through long-range national policies combined with coordinated international action to the ctivities carried out in these areas.

Indigenous and Tribal Peoples Convention 169 OIT

refers to the human rights and civil liberties of indigenous and tribal peoples and their right to land and territory, health and education; it establishes the protection of the social, cultural, religious and spiritual values and practices proper to indigenous peoples; and, among other matters, establishes the obligation to consult indigenous communities on egislative and administrative measures that may directly affect them.

DS 236/2008 MINREL

Paris Agreement **DS 30/2017 MINREL**

It has its origin in the United Nations Framework Convention on Climate Change that establishes measures for the reduction of emissions of greenhouse gases (GHG) through the mitigation, adaptation and resilience of ecosystems for the purposes of global warming. It will be applicable as of the year 2020, when the Kyoto Protocol expires. Chile committed to meet goals to reduce the increase in the intensity of GHG emissions per GDP, as established in the National Determined Contribution (NDC) of Chile.

SECTORAL LEGISLATION

4 ELECTRICAL ENERGY

Electrical Services DFL 4/20.018/2007 MINECON

It regulates the following markets, in matters such as: **Generation**: Concessions, a system of annual guotas of injection of NCRE to the SEN, PMG and

Transmission: Concessions, open access, tenders, expansion, valuation and remuneration of transmis-

· Distribution: Concessions, open access, energy

tenders for the supply of regulated customers, the price regime according to the type of customers and size of the electricity system, fare equity, distributed Coordination and operation of the SEN and the

electricity market: Security, operation and economic

transfers, public information, international exchan-

ges, ancillary services.

and less than 200 MW.

Medium Systems: Those electrical systems whose installed generation capacity is greater than 1.5 MW

RENEWABLE ENERGY2

Geothermal Energy Concessions LAW 19.657/2000 MINMINERÍA

It establishes that geothermal energy is a state own good, capable of being explored and exploited, after granting a conces**sion**, and it defines the rules for the granting of exploration and exploitation concessions.

Among other matters, it regulates the relationships between the geothermal energy concessionaires, the State, the owners of the surface land and the holders of rights over other natural resources; as well as the obligations that concessionaires must respect and the sanctions applicable in case of non-compliance.

Tax Exemption for Solar Thermal Systems LAW 20.365/2009 MINHACIENDA

It establishes a transitory bene t for construction companies, through which they can deduct from their income tax payment a tax credit equivalent to all or part of the value of the Solar Thermal Systems destined for the heating of sanitary water, which are installed in new homes built until 2020.

FUELS

Registry of Owners of Fuel Facilities

DFL 1/1979 MINMINERÍA

It establishes a registry where the owners of facilities that serve for the production, import, refining, transport, distribution, storage, supply, regasification or that commercialize fuel derived from petroleum, liquid biofuels, combustible liquefied gases and all combustible gas, must register natural

Gas Services **DFL 323/1931 MININTERIOR**

gas, gas network and biogas. This record is carried out by the SEC.

It regulates the transport, the gas distribution of the network; the marketing of gas; the system of gas network concessions and tariffs; the role of the State regarding these matters; and the criminal and infraction provisions.

Fuel Price Stabilization Mechanism LAW 20.765/2014 MINHACIENDA

t regulates the stabilization of domestic sales prices of fuels, such as automotive gasoline, diesel oil, compressed natural gas and liquefied gas. This regulation is achieved through increases and reductions in the specific taxes established by the fuel tax law.

DISTRIBUTION

Concessions and Distribution

ted to tariff regulation.

lled capacity greater than 200 MW.

(A) NUCLEAR ENERGY

Nuclear Safety and Security LAW 18.302/1984 MINMINERÍA

It regulates activities related to the peaceful uses of nuclear energy and nuclear substances and radioactive materials. It establishes measures to prevent the misappropriation and illicit use of nuclear energy, substances and facilities.

Mining Concessions LAW 18.097/1982 MINMINERÍA

It regulates the substances that are susceptible to mining concession and those whose are not. Non-concessible substances include among others, liquid or gaseous hydrocarbons, lithium, deposits of any kind existing in maritime waters subject to national jurisdiction and reservoirs of any kind located, in whole or in part, in areas that according to the law, may be determined as important for national security with mining effects.

As required by the national interest, the lithium extracted and concentrates, derivatives and compounds thereof, may not be subject to any legal act except when they are executed or concluded by the Chilean Nuclear Energy Commission or with its prior

() ENERGY EFFICIENCY

LAW 21.305/2021 MINENERGÍA

It establishes the implementation every five years of a National

Energy Efficiency Plan addressing matters of national interest.

Large consumers mandate active energy management. It establi-

shes that homes, buildings for public use, commercial and office

buildings must have an **Energy Qualification** to obtain the final or

definitive reception. It mandates the setting of energy efficiency

standards for the fleet of new vehicles.

Energy Efficiency

electrical energy. Likewise, it regulates hydroelectric plants that are governed by the provisions of the LGSE.

Maritime Concessions DFL 340/1960 MINHACIENDA

It regulates the maritime concessions granted on national public goods or fiscal

goods whose control, supervision and oversight corresponds to the Ministry of

Water Regulation Code

DFL 1122/1981 MINJUSTICIA

National Defense, whatever the use to which the concession is destined and the place where the goods are located.

Marine Coastal Spaces of Native Peoples LAW 20.249/2008 MIDEPLAN

It establishes that the goods included in the coastal border that are under the supervision and administration of the Ministry of National Defense are susceptible to be declared as marine coastal spaces of native peoples.

Income Tax DL 824/1974 MINHACIENDA

It establishes, among other provisions, an annual tax for fiscal benefit that taxes air emissions of particulate matter, oxides of nitrogen, sulfur dioxide and carbon dioxide, produced by fixed sources that add a power greater than or equal to 50 MW thermal.

Incentives for Economic Development in Arica and Parinacota LAW 19.420/1995 MINHACIENDA

It grants a tax credit in favor of all those First Category taxpayers that invest in the provinces of Arica and Parinacota, destined to the production of goods or provision of services in said zones.

General Basis of the Environment

LAW 19.300/1994 MINSEGPRES

COMPLEMENTARY SPECIAL LEGISLATION

It regulates the right to use the water that is destined to the production of It regulates the right to live in a pollution-free environment, the protection of the environment, the preservation of nature and the conservation of environmental heritage.

Among other matters, it establishes: Procedures to dictate quality standards and emission of pollutants.

The Environmental Evaluation System of investment projects. The responsibility for environmental damage. ·The Ministry of Environment.

· The Council of Ministers for Sustainability. · The Environmental Evaluation Service. ·The Superintendence of the Environment

Acquisition, Administration and Disposition of State Goods DL 1.939/1977 MTyC

It establishes that State assets may be subject to destinations, concessions of use, affectations and leases.

In particular, it states, among others, that the general provisions for sale, lease and use through concessions of fiscal lands for the installation of energy generation and transmission infrastructure.

Incentives for Economic Development in Extreme Zones

LAW 19.606/1999 MININTERIOR

It grants a tax credit in favor of all those First Category taxpayers that invest in the extreme zones of the country, destined to the production of goods or provision of services in said zones.

DELECTRICITY SECTOR

GENERATION

Small Generation Media DS 88/2020 MINENERGÍA system does not exceed 9 MW, have the option of selling energy at provisions of the LGSE. instantaneous marginal cost, being able to access the new price stabimechanism and sell your surplus power at the node price. In

addition, it regulates the interconnection procedure, the operation

and coordination of these means of generation; and the other

matters necessary for the adequate development of small generation.

Capacity Transfers between Generation Companies **DS 62/2006 MINECON**

It regulates the transfers of capacity between generation companies, Qualification, Valuation, Pricing and Remuneration of Transmission Facilities which are determined from the generation capacity that is compatible with the sufficiency and with the existing peak demand engagements

Determination and Payment of Compensations for Unavailabilit

DS 31/2017 MINENERGÍA

It regulates the compensations that coordinated electricity companies must pay in case of unavailability of the electricity supply.

Hydraulic Pump Stations Without Hydric Variability

DS 128/2016 MINENERGÍA

It regulates the treatment for pumping facilities without hydric variability as electricity storage systems coordinated by the Coordinator, as well as their technical characteristics.

Tenders for the Provision of Annual Energy Blocks with NCRE DS 29/2014 MINENERGÍA

It establishes the conditions and characteristics of the annual public tender processes for the provision of energy blocks from NCRE means and the applicable rules to materialize and operate the awarded

MEDIUM SYSTEMS

Medium Systems Operation and Management DS 23/2015 MINENERGÍA

It establishes the **provisions applicable to electrical systems** which installed generation capacity is between 1.5 MW and 200 MW, named Medium Systems.

Recovery and Expansion of Medium Systems **DS 229/2005 MINECON**

financing and faculties of the Expert It regulates the procedure for elabora-

It establishes the conditions and requirements for current installations in Medium Systems to qualify as generation facilities or transmission facilities and makes provision for the cost and demand calculation methodology.

It establishes that the Small Generation Means synchronized to the It regulates the procedure applicable to long-term energy planning in order to electrical system, whose surplus power available to the electrical determine the scenarios for the transmission system planning, subject to the

Determination of Preliminary Corridors for New Transmission Projects DS 139/2017 MINENERGÍA

It establishes the procedure applicable to the determination of alternative and preliminary corridors for those new transmission projects that may require it and the determination of the final layouts, security corridors and the constitution of electrical easements in case of determining corridors

DS 10/2020 MINENERGÍA It establishes the provisions applicable to the processes of qualification, valua-

tion, pricing and remuneration of the facilities of the transmission systems.

COORDINATION AND

OPERATION OF THE SEN Coordination of the Operation DS 125/2019 MINENERGÍA

t complements the LGSE regarding the **obligations of the Coordinator**, as well as the **planification** and programming of the operation.

Supply Security Plans Requirements **DS 97/2008 MINECON**

It regulates, among others, the circumstances under which a Supply Security **Plan is required to the Coordinator.** The plan will be a set of measures to be ful lled by the Coordinator, aiming at ensuring the supply of the relevant electrical system and the prevention of deficit situations or reducing to a minimum level the risk of them within a given period of time. The plan shall also take into consideration, where applicable, a proper handling of the hydrological resources of a system and/or the optimal use of the available consumables for thermal plants.

International Exchanges of Electrical Services DS 142/2017 MINENERGÍA

It establishes the requirements, terms and procedures for energy export and import applications and other electrical services, from and to the electrical systems located within the national territory.

Independent Coordinator of the SEN DS 52/2018 MINENERGÍA

It establishes the provisions applicable to the organisation, composition and This standard aims at establishing the minimum security conditions operation of the Coordinator. It also regulates all the necessary matters for the to be met by low-voltage consumption electrical facilities to Coordinator to exercise its duties and powers according to the provisions of the LGSE and other applicable regulations.

Ancillary Services

DS 130/2012 MINENERGÍA Ancillary Services are those services that allow the coordination of the operation of the National Electric System. The Coordinator, through the Ancillary Services, must preserve the security of the service and guarantee the most

Geothermal Energy Concessions

DS 114/2013 MINENERGÍA It regulates the **procedure and granting** of geothermal energy exploration and exploitation concessions, as well as the control and compliance with the obligations derived from the conces-

sion, whether it is granted to explore or to exploit.

Safety of Biogas Facilities DS 119/2017 MINENERGÍA

It establishes minimum safety requirements that biogas facilities must comply with in the design, construction, operation, maintenance, inspection and definitive conclusion of operations, in which any of the stages associated with generation or consumption of biogas is carried out.

Quality Specifications for Biofuels

DS 11/2008 MINECON It contains quality definitions and specifications for the production, import, transport, storage, distribution and commercialization of bioethanol and biodiesel.

NUCLEAR ENERGY

Physical Protection of Radioactive Materials in First Category Radioactive Facilities

It establishes the provisions for the physical protection of radioactive materials that are produced, treated, manipulated, stored or used in first category radioactive facilities, in order to prevent and detect their misappropriation, and other illegal or unauthorized uses and acts in the this facilities, and regulate the response in the event of the occurrence of such events.

DS 82/2020 MINENERGÍA

(co,) EMISSIONS

Procedure for Appliying a Tax Over **Atmosphere Contaminating Emissions** DS 18/2016 MMA

It regulates the obligations and procedures for identifying taxpayers who are obliged to pay the tax over emissions to the atmosphere of particulate material, Nitrogen Oxides, Sulfur Dioxide and Carbon Dioxide produced by facilities with boilers or turbines that, individually or as a group, have a thermal capacity greater than or equal to 50 MW, considering the maximum limit of the energetic value of fuel established in the Income Tax Law. It also establishes the administrative procedures required for its correct implementa-

Emission of Atmosphere Contaminants for Thermal Power Plants DS 13/2011 MMA

It seeks to control the emission to the air of Particulate Material (PM), Nitrogen Oxides (NOx), Sulfur Dioxide (SO2) and Mercury (Hg), aiming to prevent and protect people's health and the environment. This regulation is mandatory throughout the Chilean

FUEL SECTOR

SECURITY

DS 160/2009 MINECON

Security of Facilities and Production, Refining, Transportation, Storage, Distribution and Supply of Liquid Fuels

It establishes the minimum safety requirements that liquid petroleum and biofuel (LP) fuels installations must fulfill, and the operations associated with the production, refining, transport, storage, distribution and supply of LP that are carried out in such facilities, as well as the obligations of natural and legal persons involved in such operations. The latter, in order to develop such activities in a safe manner, controlling the risk in such a way that it does not constitute a danger to people and/or things. It will not be applicable to facilities in oil production fields, direct aircraft supply or LP maritime transport.

Security for the Transportation and Distribution of Gas Network

DS 280/2010 MINECON It establishes the minimum safety requirements that must be met by gas transmission and distribution networks, new and in use ("gas networks"), with respect to their design, construction, operation, maintenance, repair, modification and inspection and In addition, the obligations of natural and legal persons involved in these facilities are established. The latter, in order to develop such activities in a safe manner, controlling the risk in such a way that it does not constitute a danger to people and /or things.

Safety for the Transportation of Liquefied Natural Gas

DS 102/2014 MINENERGÍA It establishes the minimum safety requirements that the transport units of LNG must meet in the stages of design, manufacture, commissioning, operation, maintenance, inspection and definitive end of operations, as well as the obligations of the natural and legal persons that intervene in them. The latter, in order to develop such activities in a safe manner, controlling the risk in such a way that it does not constitute a danger to people and /or things.

Safety for Storage, Transportation and Distribution of Liquefied Petroleum Gas

DS 108/2014 MINENERGÍA It establishes the minimum safety requirements that LPG facilities must meet, in the stages of design, construction, operation, maintenance, inspection and definitive end of operations, in which storage, packaging, transport, transfer, and distribution activities will be carried out. It also regulates the supply of LPG, as well as the obligations of natural and legal persons involved in said activities. The latter, in order to develop such activities in a safe manner, controlling the risk in such a way that it does not constitute

Safety of Liquefied Natural Gas Plants

It also establishes the obligations of natural and legal persons involved in these activities.

a danger to people and /or things.

DS 67/2012 MINENERGÍA It establishes minimum safety requirements for the design, construction, operation, maintenance, inspection and definitive termination of LNG Plant operations, in which Natural Gas liquefaction is performed or LNG is received, stored, transferred or regasified.

OTHERS

Technical, Quality and Control Standards of Raw Oil and other Derived Fuels

It establishes technical, quality and control procedure standards applicable to fuels derived from petroleum, natural gas, liquefied gas and piped gas, and that appear in the Nomenclature of the Council of Customs Cooperation of Brussels, adapted to the Andean Area, in the Chapter 27 of the Customs Tariff.

DS 132/1979 MINMINERÍA

Use of LPG as a Fuel for Motorized Vehicles DS 52/1987 MTT

It authorizes the use of liquefied petroleum gas (LPG) as fuel for motor vehicles, provided that the system that allows the use of said fuel complies with the safety requirements established in Standard NCh 2102 Of. 87.

DS 60/2012 MINENERGÍA

Specifications of the Quality of Fuels

It establishes gasoline quality specifications for spark ignition engines, Kerosene and Diesel Oil Grade B.

Concessions for the Distribution and Transportation of Gas **DS 263/1995 MINECON**

It regulates the procedure for the granting of Concessions for the Public Service of Network Gas Distribution and of Network Gas Transportation, the Requests for such Concessions, Operating Conditions; and the Expiration of Concessions before entering into

Network Gas Service **DS 67/2004 MINECON**

It establishes dispositions that are applicable to the companies that distribute or supply network gas to the facilities of said companies, to those of the clients or consumers when these are necessary to carry out the supply, and to the relations of the distributing or supplying companies with the State and with the individuals. The aforementioned, whether or not they are public service concessionaires.

** ENERGY EFFICIENCY

Procedure to set Energy Efficiency Standards DS 97/2012 MINENERGÍA

It establishes the procedure according to which the minimum standards of energy efficiency will be established, and the standards of application that products, machines, instruments, equipment, devices and materials that use any type of energy resource must comply with, for their commercialization in the

Energy Consumption Labeling for Motorized Vehicles DS 61/2012 MINENERGÍA

It establishes the energy consumption labeling system for motorized vehicles, light and medium, that use diesel or gasoline as fuel; those driven exclusively by electric power; or the so-called

Public Lighting of Vehicular Traffic Routes DS 2/2015 MINENERGÍA

It establishes the minimum requirements applicable to the design, construction, commissioning, operation, maintenance and any other action necessary for the correct construction and operation of public lighting for the illumination of vehicular traffic routes, in order to satisfy the basic, necessary conditions and efficient for the

Procedure to Elaborate Technical Specifications of Energy Consumption Labels

illumination of roads.

DS 64/2014 MINENERGÍA It establishes the procedure according to which the characteristics of the energy consumption labels that products, machines, instruments, equipment, appliances, devices and electrical, gas and liquid fuels materials or that use any type of energy resource will have to be determined for marketing in the country; as well as the

Efficient Cogeneration Facilities DS 6/2015 MINENERGÍA

other standards necessary for its application.

It establishes the requirements that must be fulfilled by facilities where electrical energy and heat are generated in a single process of high energy efficiency, to be considered as "efficient cogeneration" for the purposes of the LGSE.

Public Lighting of Pedestrian Transit Areas DS 51/2015 MINENERGÍA

It establishes the minimum requirements applicable to any action necessary for the correct construction and operation of public lighting destined for roads for pedestrian traffic; sidewalks squares, parks, gardens, open areas, pedestrian areas, playgrounds and exercise machines, and pedestrian crossings under the road and footbridges.
